

Inspiring the
next generation
of STEM leaders

SPONSORSHIP PACKAGE

FOUNDER'S MESSAGE

We appreciate the opportunity to share with you our passion for empowering women to enter the STEM workforce through our unique mentorship program, the Girls SySTEM. For those who have already joined our endeavour of providing early, first-hand experiential learning to our bright minded youth, we thank you. Without you, we would not have been able to deliver individualized mentoring services, diverse workshops, and nationwide events to hundreds of mentees.

If you have not yet joined the Girls SySTEM, we welcome you to our growing network of mentors, mentees, and corporate partners who have fortified our passions into real-life solutions which help to inspire, nurture, and enable young female innovators towards professional STEM fields.

The heart of the Girls SySTEM Mentorship Program is rooted in my personal experiences with mentorship. Without early exposure to mentors, accomplishing my lifelong dream would not have been possible.

Our program is funded by the contributions of our volunteers and generous donations made by our global partners. We hope that you will join us in our mission of making STEM more accessible and equitable to *Inspire the next generation of STEM leaders.*

Dr Kathryn Lauren Hong
Founder & President

BREAKING BARRIERS

OUR MISSION

To uplift, inspire, and empower young self-identifying women to pursue fields that have traditionally eluded them

PROGRAM OVERVIEW

We are a non-profit professional mentorship program that partners young girls (ages 12-18) across the country with women who are studying STEM related fields. Engaging in practical learning from recognized professionals will not only aid in building positive support systems, but broaden their knowledge of the unique education pathways and career opportunities available to them.

The program matches a mentor and mentee based upon the interest of the mentee and the qualifications of the mentor. Our program is unique as each mentor and mentee pair is handpicked and cultivated by our team to ensure the best possible outcome.

In addition to mentorship, our program offers youth the opportunity to connect their personal experiences to the world of STEM. This is achieved through our specialized mentorship streams -
Discovery and UNITY+.

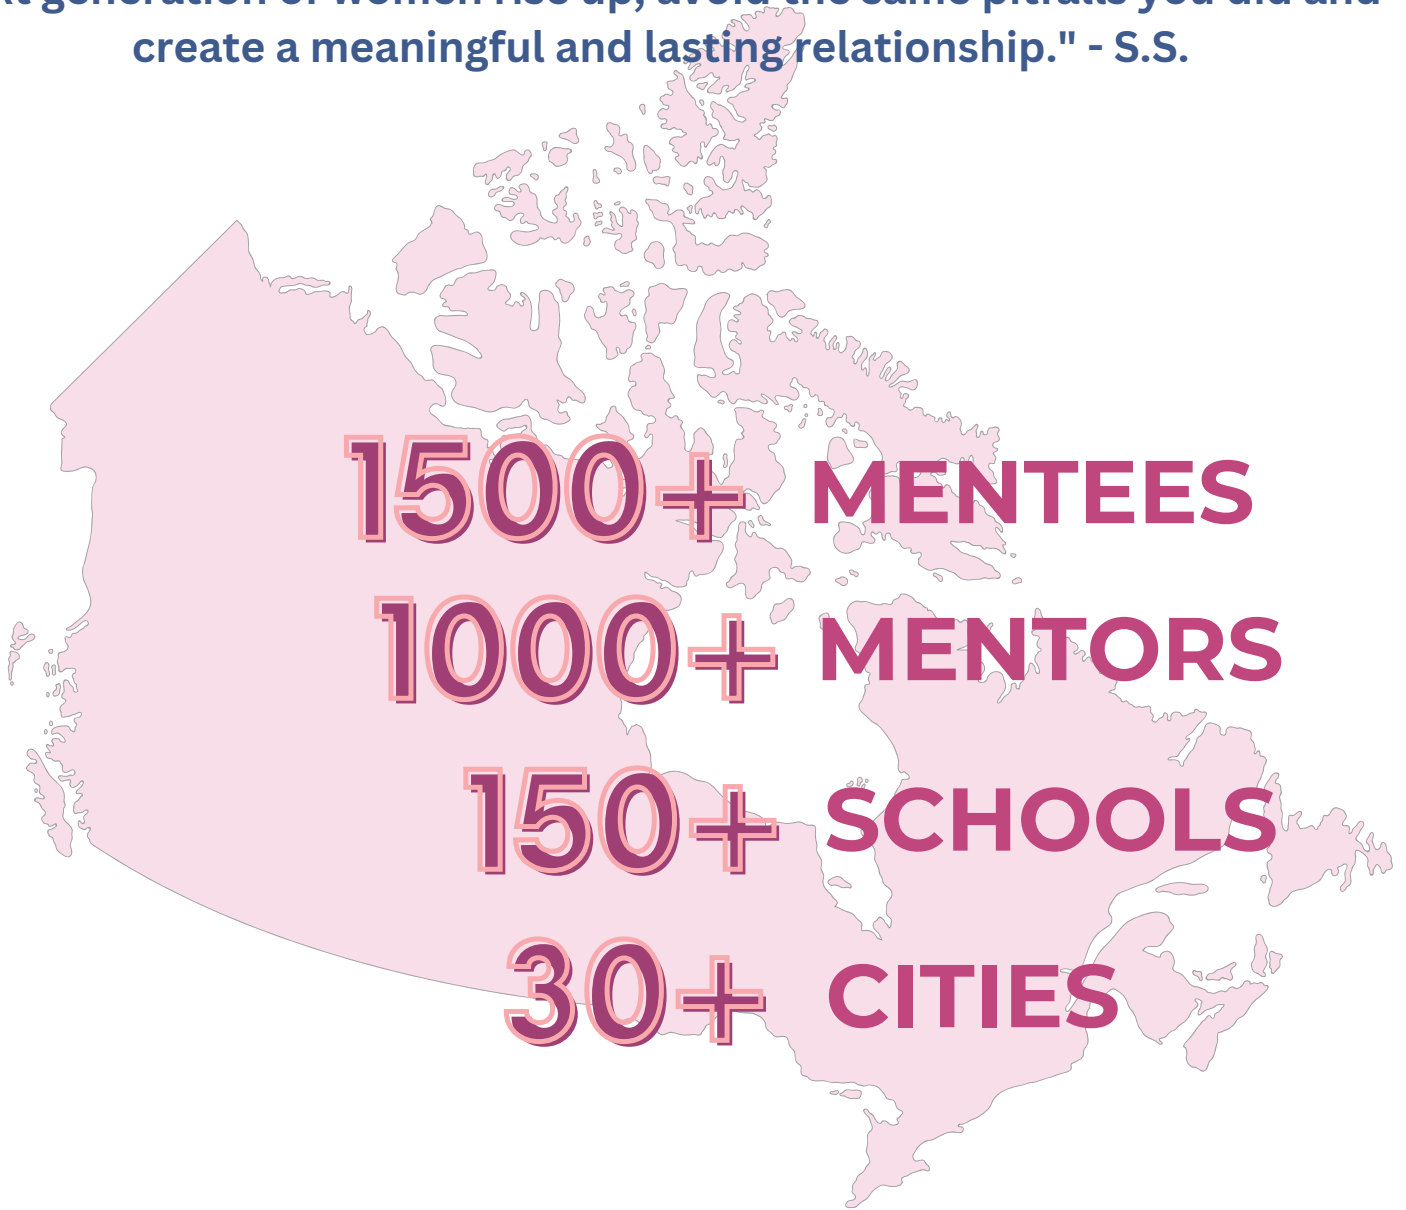

PROGRAM IMPACT

HEAR FROM OUR MENTEES

"The program was such a great experience. Thanks to GSM, I was paired with a great mentor from whom I gained such a valuable experience. With the help of the many resources and workshops provided, I feel more empowered and supported through my journey in STEM." - D.N.

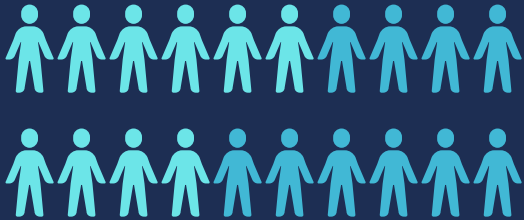

HEAR FROM OUR MENTORS

"Being a mentor with GSM is really rewarding as you get to relive and reflect on the formative moments on your career while helping the next generation of women rise up, avoid the same pitfalls you did and create a meaningful and lasting relationship." - S.S.

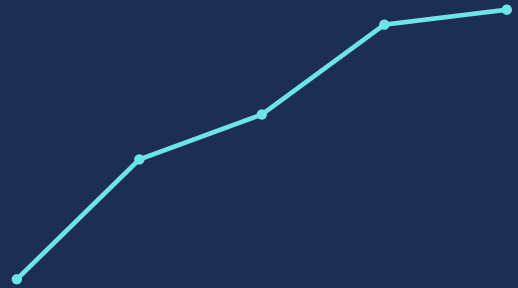

WORKPLACE DIVERSITY

37% of our mentees
identified as BIPOC
learners

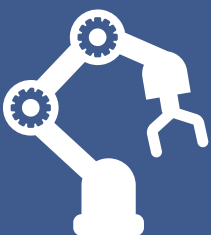

92% of mentees went on
to pursue post-
secondary STEM study

PATCHING THE LEAKY STEM PIPELINE
100% of respondents attributed their
decision to pursue post-secondary STEM
study to their mentor
